GBOLAHAN TOWOBOLA

Credit Portfolio & Risk Management, Digital Lending

Lagos, Nigeria • gbolahant@gmail.com • linkedin.com/in/gbolahantowobola1 • Portfolio

PROFESSIONAL SUMMARY

Credit portfolio manager with 8+ years in Nigerian consumer lending and fintech. Owns approval, pricing, exposure and risk policy for a consumer lending book, and redesigned eligibility and segmentation to lift approvals 15% and cut impairment 20%. Writes the SQL and builds the Power BI reporting that senior management and the Risk Committee use, and tests policy changes with A/B experiments before they reach the full book. Microsoft Certified in Power BI, Azure Data Fundamentals and Power Platform.

EXPERIENCE

Credit Portfolio Manager | **RENMONEY** *Mar 2023 – Present*

Digital consumer lender, Lagos, Nigeria

- Widened access to credit while lowering risk by redesigning eligibility and customer segmentation: approvals up 15%, impairment down 20%, FPD30 improved by 58%.
- Own portfolio performance and risk monitoring from onboarding, application and eligibility through FPD, roll rates, PAR and NPL. Use segmentation and cohort analysis to find emerging risk, economic leakage and profitable growth.
- Moved lending terms from a flat structure to pricing, exposure limits and DTI/affordability treatment set by risk band. Stronger-risk customers get better terms; weaker-risk customers sit under overlays and routing rules that protect portfolio economics.
- Built and ran A/B tests for credit policy changes on limits, score bands and affordability rules, with sample-ratio checks, covariate balance and significance testing, so expected impact and downside are known before a change goes live.
- Spotted a fraud pattern in loan applications that had gone undetected and built an email-similarity model to flag related applications. The Data Science team later adopted the approach and developed it for production.
- Built the Power BI reporting and SQL/Redshift pipelines that senior management and the Risk Committee use, with every metric traceable to source data.

Business Intelligence Team Lead | **PALMPAY** *Aug 2021 – Mar 2023*

Digital payments & financial services

- Contributed directly to 30% revenue growth by building end-to-end BI that automated analysis of transactional, operational and customer data and surfaced growth opportunities.
- Built and maintained 10+ interactive dashboards, tailored to each department, for sales, marketing and operations.
- Led the company-wide sales performance reporting system and the technical side of every BI project phase, from discovery to delivery, so teams could track quarterly targets.
- Drove dashboard adoption by running the BI project lifecycle from requirements and data modeling through delivery.

Data Analyst | **OPPO** *Dec 2020 – Dec 2021*

- Increased overall sales by 17% by analyzing sales trends and customer behavior and presenting commercial strategies to executives in Power BI.
- Cut operating costs by 15% by proposing and implementing process and system improvements found through KPI trackers and performance scorecards.

Data Analyst | **OPay** *Oct 2019 – Aug 2020*

- Raised productivity of a 200+ person salesforce by preparing and monitoring KPIs and producing logistics and business performance reports.
- Improved inventory accuracy across 10,000+ SKUs by managing product database onboarding and categorization for the B2B platform.

Earlier Roles |

FIRS (Tax Intern, Oil & Gas) • IGI Plc (Graduate Intern, Underwriting) *2018 – 2019*

EDUCATION

B.Sc. Actuarial Science | University of Lagos *2013 – 2017*

LICENSES & CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate • Azure Data Fundamentals • Azure AI Fundamentals
- Microsoft Certified: Power Platform Fundamentals • Microsoft Excel & Excel Expert (Office 2016)

SKILLS

- **Credit Risk:** Credit policy design & review, underwriting analytics, credit scoring model evaluation, decision-engine rule validation, loan limit & ticket size strategy, A/B testing & simulation, cohort/vintage analysis, collections analytics, portfolio monitoring (DPD, delinquency, roll rates, loan progression, rollovers/extensions), risk-based segmentation
- **Analytics & Data:** SQL (Amazon Redshift, PostgreSQL, MySQL), Python (Pandas, Matplotlib, Seaborn), statistical testing, data pipeline development, automated reporting
- **BI & Reporting:** Power BI (semantic modelling, DAX, star-schema data models, Power Query), MIS/dashboards for executive and board-level audiences, Microsoft Power Platform, Excel & VBA, executive presentation & risk committee reporting
