

GBOLAHAN TOWOBOLA

Credit Risk & Business Intelligence Leader — Digital Lending

Lagos, Nigeria • gbolahant@gmail.com • [linkedin.com/in/gbolahantowobola1](https://www.linkedin.com/in/gbolahantowobola1) • [Portfolio](#)

PROFESSIONAL SUMMARY

Business Intelligence & Credit Risk Manager with 8+ years of experience building analytics solutions that improve lending decisions, portfolio performance, and operational efficiency within digital lending. Combines deep expertise in credit risk analytics, portfolio monitoring, predictive analytics, SQL engineering, and Power BI development to deliver measurable business impact. Strong record of developing executive dashboards, automating risk reporting, optimizing credit strategies through experimentation, and influencing strategic decisions at CEO and Risk Committee level. Microsoft Certified in Power BI, Azure Data Fundamentals, and Power Platform.

EXPERIENCE

Credit Portfolio Manager | RENMONEY

Mar 2023 – Present

Digital consumer lender — Lagos, Nigeria

- Drove the portfolio to P&L break-even within two years of taking ownership, optimizing credit growth, exposure, pricing, risk controls and portfolio economics to improve profitability without compromising credit quality.
- Expanded access to credit while reducing portfolio risk, redesigning eligibility, requalification and rejected-customer re-entry strategies to increase approvals by 15%, reduce impairment by 20%, and improve FPD30 by 58%.
- Own portfolio performance and risk monitoring across approval, disbursal, exposure, revenue, risk-adjusted Gross Profit, ECL, FPD, roll rates, PAR and NPL, identifying material risk, economic leakage and profitable growth opportunities before they impact reported performance.
- Optimized risk-based lending economics by redesigning exposure limits, pricing and tenure across risk bands, while improving DTI, affordability and income-source treatment to align customer offers with observed repayment risk.
- Designed credit policy architecture for high-risk treatments, policy overlays, customer routing and graduation, enabling differentiated treatment based on risk and customer performance.
- Built and evaluated A/B testing frameworks for credit policy changes, including limits, score bands and affordability rules, using sample-ratio checks, covariate balance and statistical significance to quantify impact and downside risk before implementation.
- Identified a previously undetected fraud pattern through loan-application analysis and developed an email-similarity model to flag related applications; the approach was subsequently adopted and further developed by the Data Science team for production use.
- Built executive Power BI reporting and SQL/Redshift pipelines used by senior management and the Risk Committee, providing a trusted portfolio performance layer with metrics traceable to source data.

Business Intelligence Team Lead | PALMPAY

Aug 2021 – Mar 2023

Digital payments & financial services

- Contributed directly to revenue growth of 30%, by designing end-to-end BI solutions that automated analysis of transactional, operational, and customer data to show growth opportunities.
- Ensured data-driven decision-making across sales, marketing, and operations, by creating and maintaining 10+ interactive dashboards tailored to each department.
- Enabled teams to hit quarterly targets, by leading development of a company-wide sales performance reporting system and providing technical leadership across all BI project phases, from discovery to delivery.
- Drove dashboard adoption across teams, by leading the BI project lifecycle from requirements gathering and data modeling through to delivery.

Data Analyst | OPPO

Dec 2020 – Dec 2021

- Increased overall sales by 17%, by analyzing sales trends and customer behavior and translating findings into commercial strategies presented to executives via Power BI.
- Reduced operating costs by 15%, by proposing and implementing system and process improvements identified through KPI trackers and performance scorecards.

Data Analyst | OPay

Oct 2019 – Aug 2020

- Enhanced productivity of a 200+ person salesforce, by preparing and monitoring KPIs and generating logistics and business performance reports for strategic decision-making.

- Improved inventory accuracy across 10,000+ SKUs, by managing product database onboarding and categorization supporting B2B platform operations.

Earlier Roles |

FIRS (Tax Intern, Oil & Gas) • IGI Plc (Graduate Intern, Underwriting)

2018 – 2019

EDUCATION

B.Sc. Actuarial Science | University of Lagos

2013 – 2017
